

CHAKEUR ROSAMA

UI/UX Designer · Product & Landing Page Design

Petaling Jaya, Selangor, Malaysia | +60 17 224 6462 | chakeuroussama@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

UI/UX designer with a product-engineer's instinct for shipping, not just mocking up. I design and build complete product experiences — landing pages, onboarding flows, and data dashboards — using a Figma-to-code workflow accelerated by AI design tools (v0, Framer AI), then implement the front end myself in React/HTML/CSS. That full-stack design fluency lets me move fast from concept to a live, working URL rather than a static handoff. Comfortable designing for multilingual and RTL (Arabic) audiences, and for both consumer-facing products and internal enterprise dashboards used by 500+ employees. Seeking a UI/UX Designer or Product Designer role where design decisions are validated by real usage, not just prototypes.

CORE SKILLS

Design Tools: Figma, Adobe XD, Framer AI, v0 (AI-assisted UI generation), wireframing, rapid prototyping

UX Practice: user flows, conversion-focused landing page design, onboarding design, responsive design, bilingual & RTL localization (Arabic/English/French)

Frontend Implementation: React.js, JavaScript, HTML/CSS, Streamlit, component-based UI development

Product & Dashboard UX: designing stakeholder-facing dashboards, data visualization UX, enterprise workflow UX

Software & Backend (supporting): Python, FastAPI, Django REST, PostgreSQL, MongoDB

Languages: English (Fluent), Arabic (Native), French (Intermediate)

KEY DESIGN PROJECTS

- **Exhale — Quit Smoking App (Landing Page)** — Designed a calming, trust-building landing page for a smoking-cessation app; UX focused on turning an anxious first-time visitor into a confident sign-up through clear progress framing and reassuring visual tone. quit-now-landing-page.vercel.app/
- **Street Football DZ — الشارع لكرة** — Designed a fully Arabic, RTL-first landing page for a gamified street-football league app in Algeria; localized visual language and layout direction rather than mirroring an English template. algerian-street-dz-landing-page.vercel.app/
- **Dreaming Ball** — Designed the landing experience for a football pickup/booking app, with UX built around game booking flow and leaderboard-driven gamification to encourage repeat play. landing-page-dreaming-ball.vercel.app/
- **Personal Portfolio (Self-Designed & Built)** — Designed and shipped a case-study-style personal portfolio site end-to-end, from Figma wireframes to production React deployment. portfolio-ai-eta-six.vercel.app/
- **Enterprise Dashboard UX (Sales Forecasting & AP Automation)** — Designed interactive, stakeholder-facing dashboards — including adjustable forecasting controls and exception-based review views — that reduced manual reading of raw data for non-technical users. PROFESSIONAL EXPERIENCE

AI & Digitalization Intern — HICOM Diecastings

Mar 2026 – Present

Malaysia

- **Safety Monitoring Dashboard:** designed and built the UI/UX for a real-time dashboard, translating raw compliance data into an at-a-glance view for the Safety Department across all monitored plant areas.
- **Enterprise Digitalization:** designed the user flow for a company-wide e-form system, replacing confusing paper-based processes for over 500 active users with a guided digital experience.
- **PPE Safety Detection System:** built the computer vision model behind the safety dashboard, ensuring the UX layer was backed by reliable, real-time data.
- **Agentic Workflow Assistant:** designed the interaction flow for an internal automation agent (n8n) that routes emails and processes user-submitted data.

Backend Developer Intern (Remote) — Proceedit Trading

8 months

Remote

- Developed backend services and APIs, giving me a practical understanding of how UI decisions constrain and are constrained by real data and system behavior.

EDUCATION

B.Sc. Computer Science — Data Science Specialization

Expected Nov 2026

Taught in English | Malaysia | Dean's List every semester since enrolment (Oct 2023 – Present)

B.Sc. Electromechanical Engineering

2021

Taught in French | Algeria

AWARDS & CERTIFICATIONS

- Hult Prize Campus Winner, AIU 2025 — IoT + Computer Vision solution for sustainable agriculture (competed at national level)
- Swiss Innovation Challenge Participant, 2025 — presented Poltrix poultry monitoring system at national competition
- Google Cloud Professional Certification
- IBM Data Fundamentals
- IBM Cloud Essentials
- Python (Coursera)

LEADERSHIP

Co-Founder — TechNexus Club, Albukhary International University

Since 2025

Student-led tech education club

- Co-founded a student-led club bridging academic learning and industry-ready tech skills, delivering coding workshops, bootcamps, and peer-learning sessions to over 150 students.
- Designed and led hands-on sessions covering coding fundamentals, AI, and cloud computing.

ADDITIONAL EXPERIENCE

- AgriSenx (Founder, Ongoing Startup) — designed the product's user-facing IoT + computer vision interface for sustainable agriculture end-to-end; MVP complete.
- Mathematics Teacher (1 year) — taught mathematics, developing strong communication and explanation skills.
- Sales Associate (6 months) — direct client-facing sales experience.
